

Zhijian, LIANG (Jie, YUAN)

2017-2021, Integrated Circuits and Systems

- 2017 - South China University of Technology, China
- RF Energy Harvesting: Powering Internet of Things
- Z. Liang, J. Yuan, "An Event-Driven Multi-Input Multi-Output Buck-Boost Converter with Adaptive MPPT for Wide Power Range RF Energy Harvesting", IEEE International Symposium on Circuits and Systems (ISCAS), accepted, Jan. 2021.
- Z. Liang, J. Yuan, "Compact dual-wideband multi-mode printed quasi-Yagi antenna with dual-driven elements", IET MICROW ANTENNA P, vol. 14, no. 7, pp. 662-670, May 2020.
- Z. Liang, J. Yuan, "Modelling and Prediction of Mobile Service Channel Power Density for RF Energy Harvesting", IEEE Wireless Commun. Lett., vol. 9, no. 5, pp. 741-744, May 2020.
- Z. Liang, J. Yuan, "Modelling and optimization of high-efficiency differential-drive CMOS rectifier for UHF RF energy harvesters", IET Power Electronics, Vol. 12, pp. 588-597, Mar. 2019.
